Summary

Senior architect for complex product systems. I help teams convert ambiguous constraints into clear architecture, durable delivery, and calm execution across platforms, resilience, and security.

Selected experience

Independent / Advisory ? Senior Software Architect (2024?Present)

Architecture advisory, platform strategy, and design leadership.

Prior product organizations ? Staff / Principal Engineer & Architect (2016?2024)

Led cross-team architecture for platforms, resilience, and DX.

Selected work

? Platform consolidation without freezing delivery

? Event-driven order flow under peak uncertainty

? Security architecture product teams could actually use

Philosophy

Clarity beats cleverness. Constraints are design material.

Delivery is part of the design.
